Our partnership

Revenue Growth

Empowering our partners to retain
and grow their revenue

Protection

Giving MNOs full control and security
over their network

Stability

Providing a reliable solution and
continuous monitoring

Game changer

Driving changes and predicting
market trends

Network Protection suite

Driven by humans • Enhanced by AI

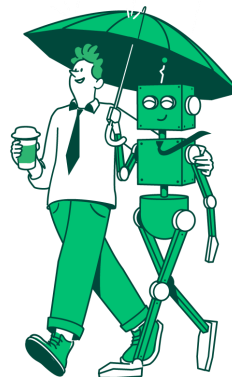

Messaging

- Proactive SMS fraud detection
- Signature-based analysis
- Auto-blocking functionality
- Continuous monitoring
- Signalling and protection over SS7

Voice

- AI/ML based call profiling
- Call validation
- Flash and robo calls management
- Voice fraud forecast and mitigation

gms

Ever-evolving alternative channels

- A2P alternative channels monitoring and management
- Signature fingerprinting
- Advanced network security

AI enhancing network security capacities

Traffic processing

Traffic inputs, rules setting and traffic outcome

AI

Automating messaging grouping and improving firewall bandwidth and performance

SMS Analysis

Rules-set implementation, parameters and profiling

AI

Templating fraud activities, signatures, speeding content analysis processes and optimising engineers activities

Forecast

Fraud and trend prediction

AI

Checking timelines outcomes bringing consistency, and control future traffic flows

Traffic corelation

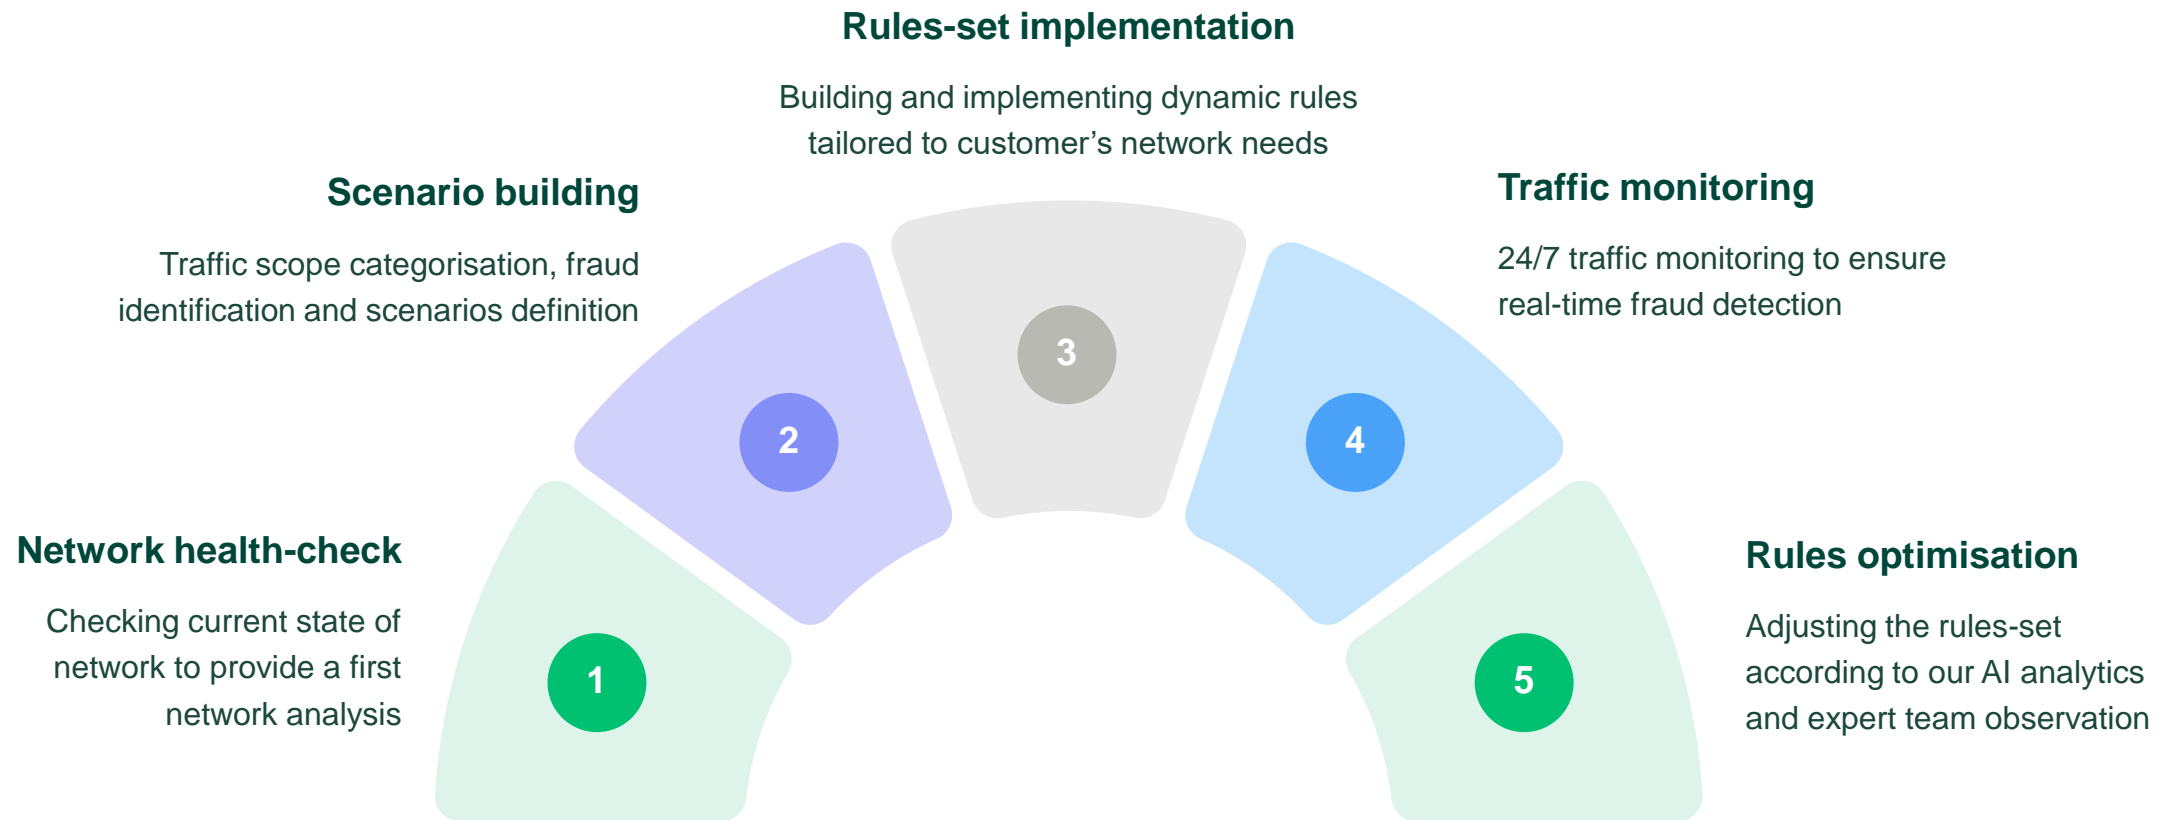

Results comparison and traffic recovery

AI

Machine-Learning matching bypasses and organic traffic

Solution workflow

The benefits. For you.

Enhanced network security

Ensuring a fully protected environment for both SMS and Voice traffic

Revenue Protection

Preventing revenue leakage and enabling A2P SMS traffic recovery

Improved service quality

Blocking unwanted traffic and ensuring reliable service for users

Seamless Integration

Minimising operational disruption and ensuring immediate protection

Process Automation

Enabling effective fraud management without need for human intervention

Real-time evaluation

Minimising the risk of false positives

Testimonials

What do they say about us?

“

GMS solution has expanded our ability to identify and block flash calls, making a significant contribution to the creation of a secure call management system.

- Ucell -

“

The SMS Firewall provided by GMS safeguards Banglalink's messaging infrastructure against fraudulent activities, protecting our revenues and enhancing service quality.

- Banglalink -

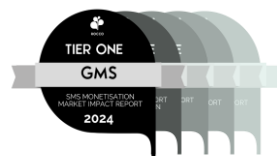

“

The SMS Firewall provided by GMS has proven to be an outstanding asset for our business. The solution's robust features and seamless integration have significantly improved our operational efficiency and security.
